Aggreko Cooling Tower Services (ACTS) offer quick, effective solutions for all of your temporary cooling tower needs

The availability and effectiveness of **rental cooling towers** has drastically changed the way business works in nearly every industry:

- No longer does production have to suffer during hot summer months or peak demand times - companies can rent towers for **supplemental cooling capacity** .
- Facilities no longer have to shut down for the **repair and maintenance** of their permanent cooling towers - they can divert the process to temporary towers.
- Rental cooling towers can be brought in after major storm damage, a fire, or general outage of your cooling tower - **emergency cooling** is available quickly from Aggreko.
- Some facilities use rivers or lakes to remove heat from a process, but that can be effected by ambient conditions, regulations, and environmental implications - rental cooling towers offer **thermal discharge temperature relief** without violating temperature limits.

Where will you turn when your cooling tower fails or a short-term issue overwhelms the capacity of your tower? The obvious choice is **Aggreko Cooling Tower Services** .

The Rental Cooling Tower Experts

At facilities across North America, our team has dramatically reduced the risks involved with the loss of properly functioning cooling towers. With the largest fleet of modular, temporary cooling towers, 24-hour availability, and expert service, Aggreko Cooling Tower Services can help you address any emergency, maximize your production, and keep your operations running smoothly.
